Backend online round: *Typescript, Nest.js, Jest, Docker* [GitHub]
Frontend online round: *Typescript* [GitHub]

Participated in the online round, haven't proceeded to the final.
- Backend task was to implement a minimal waste algorithm in the domain of box cutting
- Frontend task was to realize a synthesizer without using any libraries

EDUCATION

Udemy
- **The Complete Node.js Developer Course (3rd Edition)** — Aug 2020 - Jan 2020

Refactoring Guru
- **Dive Into Refactoring Interactive Course** — Dec 2022 - Dec 2022

ABOUT ME / HOBBIES

I am a passionate tech enthusiast, who is into drones, table tennis and playing guitar. Started my programming path at the young age and through that time I have learned quite a lot of information which I love to realize in the real-world projects.
